

A HOUSE BECOMES **YOUR** HOME

For Kon-strux Developments, the best part of the job is seeing a client's house turn into a home. The women-owned company starts every project by listening, asking questions and learning about your unique needs and desires for your renovation.

To help you get over the biggest hurdle in deciding whether or not to renovate in the first place, Kon-strux works with you to develop a budget that supports your Wish List and visa versa. Once your project is underway, they systematically track and report all costs and changes letting you know exactly how your renovation dollars are spent. 'Customer Walk-Throughs and Sign-offs' happen at each critical juncture, keeping control of the project squarely in your hands.

"We aren't here to offer cookie-cutter solutions," says co-owner Shannon Lenstra. "We're in this to help improve people's lives in the most important place – Home."

Ask us how you can turn your house into your dream home.
